

12V Digital Air Compressor

Read these Operating Instructions carefully before use.

Keep these instructions for later reference.

Always operate the Compressor according to these instructions.

To Operate

1. Connect the Valve to tyre air valve and push down the Valve Lock Lever to secure the connection.
2. Connect the 12V plug, the light and the digital display will operate.
3. Press the 'M' button to change to the required pressure units.
4. Press and hold the '+' or '-' button to set the desired pressure.
5. Turn the power switch on to begin inflating. The compressor will stop when it reaches the preset pressure.
6. Turn the power switch off and disconnect the 12V plug.

CAUTION: DO NOT over inflate!

Important Safety Information

- Compressor: Use 12V DC only.
- Make sure that your vehicle cigarette lighter is free of any ash residue or debris. A dirty cigarette lighter can cause the compressor and power cord to overheat. Overheating can cause damage to your compressor/vehicle and could cause bodily harm or injury.
- Disconnect power when not in use.
- This air compressor is designed to inflate car tyres, bike tyres, sports equipment, air beds, beach toys and other inflatables. **DO NOT** use for any other purpose than inflating. If you do so, bodily harm or personal injury can occur.
- When operating your compressor **DO NOT** run for more than 10 minutes continuous use. Allow compressor to cool down for 10 minutes before re-using.

Note

- After using, disconnect the 12V plug.
- The compressor is not a toy. Keep away from children at all times.
- **DO NOT** carry compressor by air hose or power cord, damage may occur.
- **DO NOT** leave the compressor unattended while in operation.
- **DO NOT** over-inflate. Be sure to follow the manufacturers instructions for the item you are inflating.
- Keep the compressor away from flammable areas/liquids at all times.
- **DO NOT** operate the compressor in wet or damp areas.
- Operate the compressor only with the accessories that are included.
- This compressor operates only on 12V DC.
- **DO NOT** attempt to operate this compressor with any other source or voltage.
- **DO NOT** rewire or reconfigure compressor from its original design or personal injury or bodily harm may occur.
